

Gym mat Everroll Crosstile

The Everroll Crosstile from REGUPOL is robust tile range for fitness centres. Quick to install, it also serves primarily to protect your sub-base. If dumbbells or kettlebells are dropped or put down in an uncontrolled manner in your fitness centre, the necessary cushioning and shock absorption is provided by our REGUPOL everroll crosstiles, which are extremely robust and resilient.

Product Characteristics

The neutral character of the tiles in the Everroll Crosstile range for fitness centres is a most striking feature. They can be laid loosely and connected to each other by means of a plug-in dowel system, which enables quick and easy installation. Our fitness centre flooring also serves to protect the sub-base and provide athletes with very good training conditions.

Material

Tile product, made of PUR bonded SBR granulates

Thicknesses:

30 mm, 43 mm

Standard Dimensions:

Length 1,000 mm, width 500 mm

Weight:

30 mm = approx. 34.0 kg/m²

43 mm = approx. 37.0 kg/m²

Impact Resistance:

> 21 Nm based on EN 14904 / EN 1517

Slip Resistance:

R 10 based on DIN 51130 (02.2014) and ASR A1.5/1,2

Force Reduction:

up to 59 % based on EN 14904 / EN 14808

Fire Classification:

E_{fl} based on EN 13501-1:2010-01 / EN9239-1:2010-11

Product Applications

Free weight training & weightlifting

- protects the subfloor
- quickly installed
- non-slip
- sustainable
- durable
